PROFESSIONAL

## **UltraSpeed System.**

### **Performance made easy.**

The heart of the system is the innovative (patented) press, which can be used on a variety of buckets with or without lever depending on the application area.

Used with a simple break frame, four high performance mops and our new ergonomic handles, UltraSpeed is the latest in high speed, ergonomic flat mopping with colour coding featuring on all handles and buckets.

### **Performance.**

The system is so simple to use anyone can start cleaning without the need for training. The unique press wrings out more water than traditional gear presses, allowing floors to dry faster and be back in use quicker –

vital in high traffic areas. The unique strip fastening means there is no need to remove mops for wringing.

### **Ergonomics.**

The innovative new press design allows mops to be wrung with less effort and without the need for excessive bending. The lightweight materials and ergonomic grips used in all parts of the system reduce the effort required in the cleaning process.

### **Versatility.**

The system easily covers all your cleaning requirements, the mops and frame can be used with a 15 ltr single bucket, a 25 ltr single bucket or 2x25 ltr doublebucket on wheels depending on the size of your area. The mops

and frames are versatile and can be used to clean floors, skirting boards, walls, staircases and ceilings.

### **Cost-in-use.**

In addition to the time-saving properties, the UltraSpeed System also reduces initial costs. Low initial investment, high durability and above all – fast, efficient wringing and mopping – results in a great cost efficiency from day one.

## Material

### UltraSpeed Kit 15 litre, 25 litre and 2x25 litre

- Strong but light Polypropylene (PP) buckets with internal capacity scale, easy pour spouts and ergonomic carry handle
- Coloured clips to use buckets in a colour coding system
- High efficiency gearless wringer press with handle holder for easy storage
- UltraSpeed Kit 25L and 2x25L supplied with lever press for extra wringing pressure and large Ø 75 mm non-marking castors
- Weight: 15L Kit 1800 g, 25L Kit 3600 g, 2x25L Kit 6800 g.

### UltraSpeed frame

- Light (425 g) durable 40 cm break frame for use with UltraSpeed mops as well as standard 40 cm pocket mops
  - Swivel joint incorporates ball catch for easy cleaning of vertical surfaces
  - Quick mop attachment
  - Easy, fast rinsing/wringing of mops without removal from the frame.
- UltraSpeed MicroLite Mop**
- Micro- fibre mop for deep down cleaning of all floorings
  - Polyester microfibres and longitudinal nylon stripes aid in removing stubborn stains.

## Usage

The UltraSpeed System is designed to save you time whilst reducing your floor cleaning costs in all general building and HoReCa environments, irrespective of size with or without laundry facilities.

### Instructions for use:

1. Attach the mop to the frame.
2. Soak the mop in the bucket, lift the mop and frame from the bucket and place the hanging mop in the wringer.
3. Press the mop handle down to wring the mop, by using the lever of the press an extra pressure can be applied (fast drying floor).
4. Place the mop on the floor, push down to lock the frame and start mopping. When it's time to rinse again, press the pedal button on the frame with your foot in order to break the frame.
