

SuperMop Ag bucket & wringer

The SuperMop bucket just got even better

New oval design in a pale blue finish, which now compliments the Vileda Professional family of products.

- New bionic wringer
- Colour coded funnels to help prevent cross contamination
- Easy pour spout to dispose of waste water
- Hand grip in the base for easy lifting and pouring
- 10 litre capacity with fill level
- Robust metal handle with ergonomic grip

Time saving

The innovative design of the new bionic wringer applies 360° pressure from all sides providing efficient release of soiled water from the SuperMop Ag mop head. After refilling the bucket, the wringer also ensures that just the correct amount of clean water is retained in the non-woven strands of the mop head for effective mopping.

The mop head releases water more evenly onto the floor during mopping, allowing floors to dry quickly and streak free. Therefore floors are back in use faster.

Durable and ergonomic

- Easy to wring - less force required than conventional socket mops
- Hand grip in the base for easy lifting and pouring
- Strong, lightweight bucket is highly portable and easy to store
- Robust metal handle with ergonomic grip

TSU	Description	Colour	Size (L)	Units/Case
138924	Bucket & Wringer	Blue	10	5
138925	Bucket & Wringer	Red	10	5
