## Detergent, disinfectant deodoriser concentrate in SmartDose®

### Description

Highly concentrated daily cleaner disinfectant for all types of water-resistant hard surfaces and floors, including protected floors.

### Key properties

- Bactericidal, fungicidal and virucidal activities
- Cleans without altering the shine of emulsions
- Fresh pine fragrance
- Low foam profile

### Benefits

- Disinfecting properties guarantees hygiene and safety by fighting against cross-contamination
- Can be used on most floors and surfaces, including protected floors
- Pine perfume increases the perception of cleanness in your premises, leaving a fresh fragrance
- Can be used in a scrubber drier as well as mop applications

### Use instructions

TASKI Degragerm is supplied in SmartDose dosing system for convenient and controlled dosing of the product into a spray bottle, bucket or machine tank.

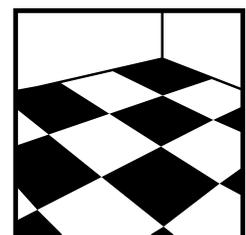

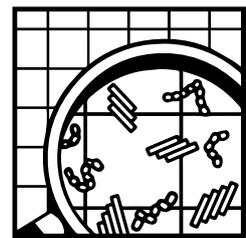

### Dosage:

**Spray application:** Fill the 500 ml trigger bottle with water. Turn yellow head to trigger bottle position, pull head up, then push down fully to dispense 1x4ml (0.8%) into the trigger bottle. Attach the trigger and shake bottle gently.

**Bucket/Machine application:** Fill bucket/machine tank with water. Turn yellow head to bucket position: pull head up, then push down fully. Dose 1x27ml per 5L water (0.5%).

### Application:

1. **Spray method:** Spray the solution on a damp cloth and wipe. Use a sponge pad to remove stubborn soil. Rinse or replace the cloth regularly.
2. **Bucket method:** Surface cleaning: Apply the solution with a cloth/sponge or mop and wipe. Let it work for the required time according to the microbiological data. Use a sponge pad to remove stubborn soil. Floor cleaning: Apply the solution with a mop. Let it work for the required time according to the microbiological data and remove soiled solution.
3. **Machine method:** Fill in the solution into the full water tank of a single disc machine or scrubber drier. Apply the solution (indirect method). Let it work for the required time according to the microbiological data. Remove the soiled solution with the scrubber drier or a wet vacuum cleaner.
