

CLEANS, SANITISES & PROTECTS ALL SURFACES AND HANDS

- XtraProtect is an antimicrobial multi-surface sanitiser that is British lab tested to kill 99.99% of Coronavirus Covid-19, Norovirus and other viruses. It is non-toxic and safe to use on hands.
- This is a multipurpose sanitiser so the 100ml "on-the-go" spray is convenient to use for sanitising shopping baskets, door handles, car and transport surfaces, deliveries, desk and worktops... in fact any surface you touch.
- XtraProtect does not use alcohol as a method of killing micro-organisms but instead uses a synergy of biocides and is certified to be effective against the current coronavirus strain.
- Normal sanitisers contain 60 – 80% alcohol. This type of formulation is only effective when used on clean hands. If used on soiled hands the effect of the alcohol can be reduced by more than 50%.
- XtraProtect is certified also to repel micro-organisms from surfaces for up to eight days after application and will be effective in less than 2 minutes.
- XtraProtect has been used in nursing homes for several years with only positive results. This area of personal care is rigorously and regularly inspected, we have only had praise for the product, and its results when inhibiting the spread of infections.
- Laboratory tested to BS EN 1276 & 14476 standards - non toxic /anti-bacterial / anti-viral / bio-degradable.
- The bottles are made from recycled or recyclable plastics with recyclable and reusable trigger sprays.
